EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

2. Authorization for this examiner's amendment was given in a telephone interview with Dirk Coldeway on August 2, 2005.

3. The following changes to the drawings have been approved by the examiner and agreed upon by applicant: on August 2, 2005. In order to avoid abandonment of the application, applicant must make these above agreed upon drawing changes.

In Figure 7, ~~delete drawings separated from the claims section~~ at top of figure.

In Figure 8, ~~delete drawings separated from the claims section~~ at top of figure.

REASONS FOR ALLOWANCE

4. The following is an examiner's statement of reasons for allowance: The Examiner finds that the amended claims in the revised Specification, Claims, and Drawings filed on 27 July 2005 for independent claim 1 concerning a method for creating a linked list data structure to which prefetching can be applied in order to minimize the number cache misses endured during traversal persuasive as applied to independent claim 1. The prior art Pieper et al. (U.S. Patent No. 6,675,374), Huang et al. (U.S. Patent No. 6,009,265), and Knittel et al. (U.S. Patent No. 6,266,733) neither renders obvious nor anticipates the combination of recited elements in light of claim 1.

Art Unit: 2167

In particular, no prior art has been found that teaches the limitation "additions to the head of the list are added by decreasing the list head index to $H - 1$ modulo P and adding new nodes to the head of the list indeed by the thus updated value of the head index".

5. The Examiner finds that the amended claims in the revised Specification, Claims, and Drawings filed on 27 July 2005 for independent claim 15 concerning a method of traversing a single tree by creating a forest of subtrees persuasive as applied to independent claim 15. The prior art Pieper et al. (U.S. Patent No. 6,675,374), Knittel et al. (U.S. Patent No. 6,266,733), and Bjork ("Binary Trees") neither renders obvious nor anticipates the combination of recited elements in light of claim 1. In particular, no prior art has been found that teaches the limitation "discontinuing the level-order traversal when a number of subtrees sufficient for effective software pipelined traversal has been achieved, the aforementioned array of pointers thereby containing the pointers to the root of the trees of a forest to which software pipelined traversal can be applied".

CONCLUSION

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
